Attrition by Age Group

- The average age of resignation for individuals between **26-35**, particularly among males, with a total of 70 individuals in this age group comprising 19.02%.

The potential explanation could be attributed to their income, as their average salary was discovered to be **4.82K**.

# HR ATTRITION ANALYSIS

Attrition by Job Role

- It's noteworthy that the **Research & Development** department experienced the highest attrition rates, with 133 employees leaving, particularly among Library Technicians and Research Scientists.

Attrition by Education Field

- ➔ The main reason for the attrition among Library Technicians and Research Scientists could be their salary, as their average salary was found to be **3.24K**.

# HR ATTRITION ANALYSIS

## Importance of Employee Attrition Analysis:

- **Employee satisfaction**

➔ Analyzing factors that contribute to employee satisfaction can help organizations identify areas for improvement in their work environment, which can lead to higher employee satisfaction and better performance.

- **Performance management**

➔ Analyzing performance-related factors such as training, job satisfaction, and work-life balance can help organizations better manage their employee performance and optimize productivity.

- **Talent retention**

➔ By identifying the factors that contribute to employee retention, organizations can take proactive measures to retain their top talent and avoid losing valuable employees to competitors.

**Solution:** Organizations can make informed decisions about HR policies, benefits, and training programs that can improve overall employee satisfaction.

# HR ATTRITION ANALYSIS

## Solutions for the attrition:

- **Employment Duration:** Most attrition occurs during the first few years of employment

**Solution:** Conduct periodic check-ins and performance reviews to address any concerns and provide opportunities for growth and development.

- **Age:** Younger workers have higher turnover compared to older workers

**Solution:** Offer opportunities for career growth and professional development to engage and retain younger talent.

- **Department:** Research and development department has the highest attrition

**Solution:** Address any work-related challenges, such as workload distribution, communication gaps, or lack of growth opportunities.

- **Job Role:** Laboratory technicians have the highest attrition

**Solution:** Conduct exit interviews or surveys to understand the reasons for high attrition among laboratory technicians.
